Art Unit: 2838

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

1. Claims 6, 11 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 6 and 11, the phrase "said freewheeling diodes" lack antecedent basis.

In claim 14, the phrase "said second diode" lacks antecedent basis.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-5, 7-10, 12, and as far as understood, claims 6 and 11 are rejected under 35 U.S.C. § 102(e) as being fully anticipated by Sato et al (5,764,496).

Sato et al discloses, (in, e.g., figure 1) a diode full-wave bridge rectifier (DB), a freewheeling current path (D5/D4/D6), and a blocking means (D3), blocking means coupled between said rectifier (DB), to substantially flow through said freewheeling current path.

Art Unit: 2838

Allowable Subject Matter

4. Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claim 14 would be allowable if rewritten to overcome the rejection under 35 U.S.C. § 112 and to include all of the limitations of the base claim and any intervening claims.

6. As allowable subject matter has been indicated, applicant's response must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 C.F.R. § 1.111(b) and section 707.07(a) of the M.P.E.P.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lesea (5,345,164) and Suzuki et al. (5,331,534) show power factor corrected dc power supplies.

8. Any inquiry concerning this communication should be directed to Y. J. Han at telephone number (703) 308-0109.
